The Importance of Mobile Optimization

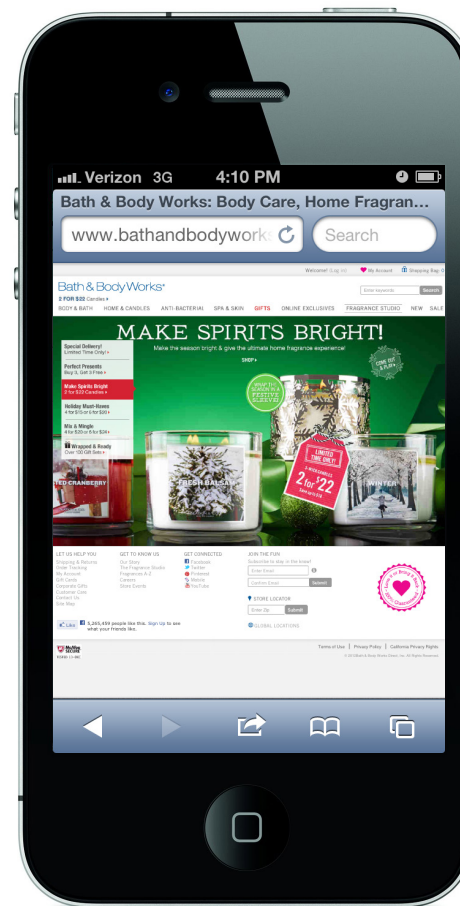

WHY SHOULD I OPTIMIZE MY DESKTOP SITE FOR MOBILE?

Mobile is here to stay. If you are not following and working with mobile trends, you are working against them and possibly losing loyal smartphone users in the process. Customers expect an experience tailored to their mobile device.

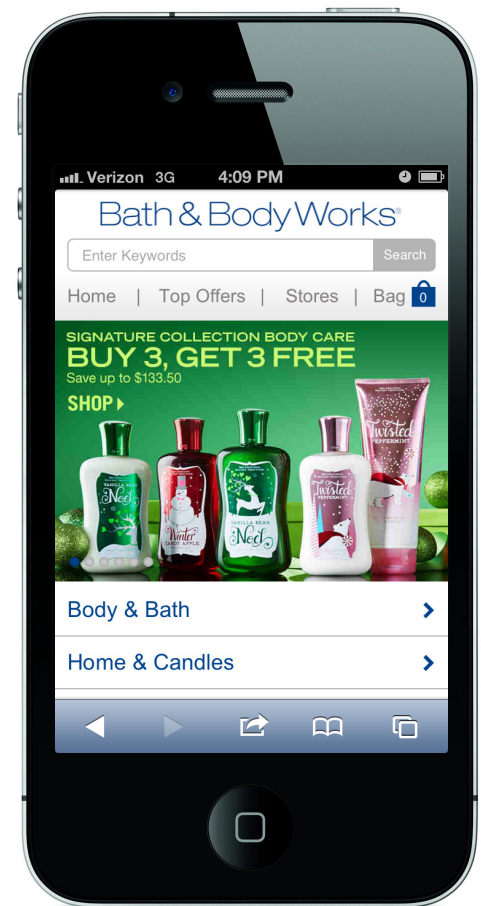

This mobile vs. desktop study was initiated to prove that optimizing desktop sites for smartphones provides a better user experience and is worth the investment.

A/B TEST OVERVIEW

- **Test A**
Approximately **30 percent** of smartphone users were sent to the non-optimized Bath & Body Works desktop site
- **Test B**
Approximately **70 percent** of smartphone users were redirected to the optimized Bath & Body Works mobile site

TEST A
smartphone users sent to
non-optimized desktop site
