

BRANDING BRAND ANALYTICS

THE IMPORTANCE OF MOBILE OPTIMIZATION

PURPOSE

1

WHY SHOULD I OPTIMIZE MY DESKTOP SITE FOR MOBILE?

Mobile is here to stay. If you are not following and working with mobile trends, you are working against them and possibly losing loyal smartphone users in the process. Customers expect an experience tailored to their mobile device.

This mobile vs. desktop study was initiated to prove that optimizing desktop sites for smartphones provides a better user experience and is worth the investment.

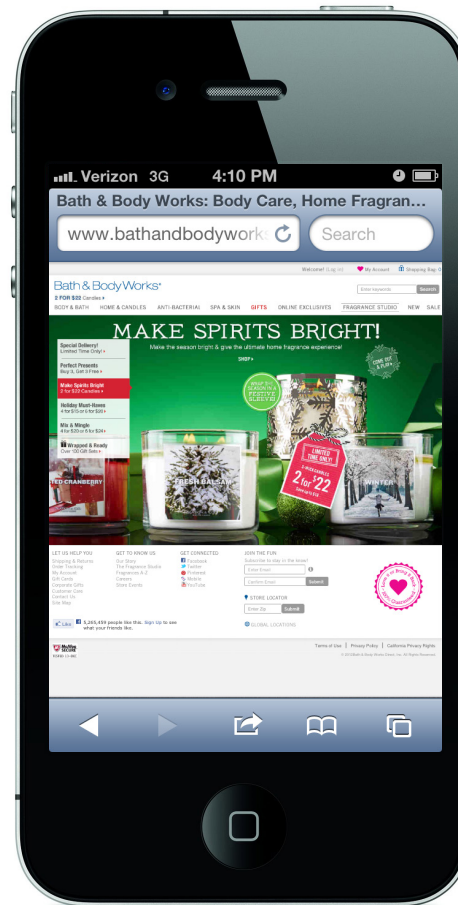

A/B TEST OVERVIEW

Test A

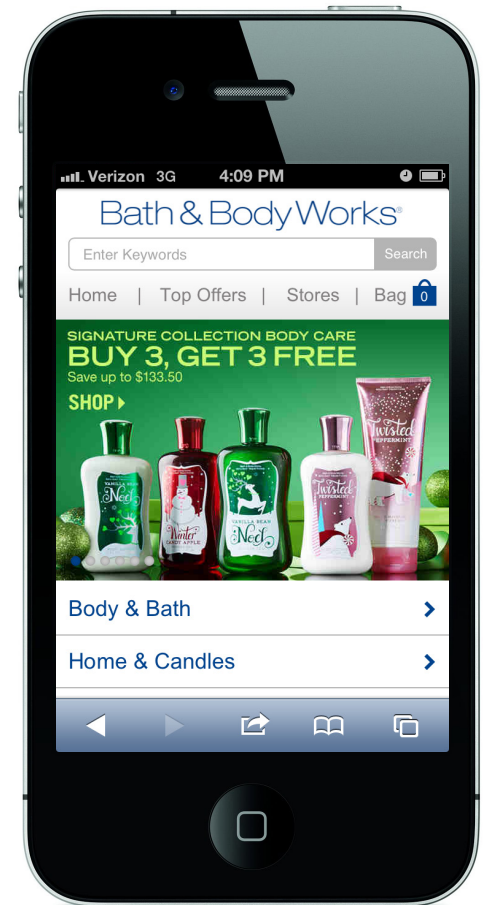

Approximately **30 percent** of smartphone users were sent to the non-optimized Bath & Body Works desktop site

Test B

Approximately **70 percent** of smartphone users were redirected to the optimized Bath & Body Works mobile site

TEST A
smartphone users sent to
non-optimized desktop site

TEST A: **SMARTPHONES ON DESKTOP SITE**TEST B: **SMARTPHONES ON MOBILE SITE**

OVERVIEW

ORIGINAL, INNOVATIVE & UNRIVALED.

Striving to support all forms of smartphone and tablet traffic, Branding Brand is the largest mobile commerce provider to the Internet Retailer Top 500. The company powers and possesses analytics insight to over 100 sites.

Based on this data, a dedicated usability team analyzes, tests and determines the best practices for optimizing conversion. As the leading mCommerce platform, Branding Brand's mobile-optimized sites outperform desktop sites on smartphones because they consistently provide a superior overall experience through design and usability.

Branding Brand's patented technology is proven, reliable and limitless, enabling any aspect of a site to be uniquely and effectively optimized for a mobile experience. This technology can transform your brand's desktop experience for on-the-go users, who can enjoy browsing, shopping and purchasing on your site anytime, anywhere.
